

Recommended Alternative – Woodward and Huron Intersection (C)

EXISTING

View Looking North on Woodward at Huron

PROPOSED

View Looking North on Woodward at Huron

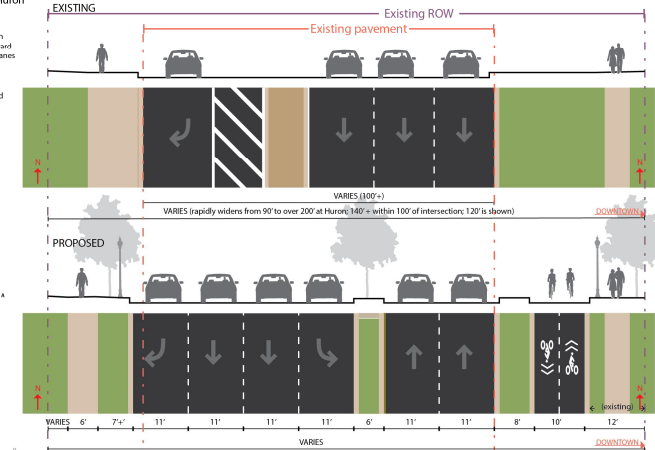

North of Huron View Looking North

7] North Woodward Ave (B-median)

Lafayette St to Huron St (M59), Huron approach from the north

The two-way bicycle path is proposed as an off-road facility on the west side of Woodward Avenue. Exclusive left-turn and right-turn lanes are proposed at West Huron (M-59). If the western curb is moved, there is room for approximately 100 feet of storage for the southbound right turn. Right-of-Way would need to be acquired to accommodate additional storage depending on expected queuing.

This alternative explores the option of also incorporating a median.

South of Huron View Looking North

8] Woodward (A-median)

Huron Ave (M59) to Orchard Lake / Auburn, midblock

The two-way bicycle path is proposed as an off-road facility. A center left-turn lane is proposed in this section due to the closely spaced intersections and number of driveways without changes to the proposed cross-section or curb.

This alternative explores the option of also incorporating a median. The western and eastern curbs would need to be moved.
